PROFESSIONAL SUMMARY

Fullstack developer building production web applications across fintech, ecommerce and education, with equal depth on both sides of the stack. Builds React and Next.js interfaces backed by Node.js, Express and NestJS APIs, and handles the parts of payment work that break in production, including gateway integration, callback verification and reconciliation against provider records. Currently contracting, and available for remote engagements.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, SQL

Frontend: React, Next.js, React Native, Redux, Zustand, Tailwind CSS, Chakra UI

Backend: Node.js, NestJS, Express, REST API design, JWT authentication, role based access control

Databases: PostgreSQL, MySQL, MongoDB, Prisma, TypeORM, Sequelize. Schema design, indexing, query optimization

Integrations: Payment gateways (Stripe, Paystack, Flutterwave, FiatMatch), identity verification (Dojah), SendGrid, Firebase

Infrastructure & Tooling: Docker, CI/CD, AWS, Google Cloud Platform, DigitalOcean, Git, Jest

PROFESSIONAL EXPERIENCE

Fullstack Developer | Freelance and Contract — Apr 2023 – Present

- Currently building 234DEALS (234deals.com), a live Nigerian multi vendor marketplace on a Next.js frontend with a Node.js and Express backend. Built the CSR vendor support dashboard with scoped role based permissions, an admin hero management panel with drag and drop ordering and Cloudinary uploads, a referral QR code feature, and an AI powered product SEO description generator.
- Removed a client polling loop responsible for roughly 720 requests per hour and cut image payloads through caching and Next.js Image optimisation.
- Delivered 25+ custom web applications for SMEs and startups across fintech, healthcare and ecommerce, including secure payment flows on Paystack, Flutterwave and Stripe covering checkout, webhook verification and transaction state handling.
- Established automated CI/CD pipelines with Docker and cloud deployment, reducing deployment time by 40%.

Fullstack Developer (Contract) | Thelix Holdings — Sep 2025 – Mar 2026

- Built features for a school management portal serving multiple schools, working in NestJS on the backend.
- Developed the behaviour tracker module for recording and monitoring student conduct across classes and terms.
- Built the company wide dashboard aggregating reporting across all strategic business units.

Fullstack Developer (Contract) | WALLX Diaspora — Apr 2025 – Aug 2025

- Architected RESTful APIs in Node.js and Express for a cross border payment processing platform.
- Integrated the FiatMatch payment gateway for CAD wallet crediting and automated KYC verification through SendGrid.
- Reduced API response times by 35% by profiling slow MongoDB queries and adding targeted compound indexes.

Fullstack Developer | ITSKILLSCENTER — Feb 2020 – Apr 2023

- Developed an ecommerce dashboard for the Peppermart project in Next.js and Tailwind CSS, supporting 1000+ daily active users.
- Built a fullstack blog platform with React, Redux, Node.js, Express and MongoDB, including real time content management.
- Implemented responsive UI components and shared state management patterns reused across client projects.

SELECTED PROJECTS

Askddietician: Clinical nutrition therapy platform enabling personalised consultations, built with Next.js and EmailJS.

CoolRide: Ride sharing platform connecting passengers with verified drivers. Node.js, Express, MongoDB and Docker, integrating Paystack for payments and the Dojah API for driver verification.

EDUCATION

BSc, Industrial Physics | Federal University of Technology, Owerri — 2014
